**WENZHOU HONGMI PNEUMATIC CO.,LTD**

# COMPANY » » INTRODUCTION

Wenzhou Hongmi Pneumatic Co.Ltd, founded in April of 2021, as the trading headquarter of Huiteli Pneumatic Factory, in Wenzhou, Zhejiang province, which has the production experience over 17 years.

We are integrates industrial company of manufacturing and exporting, mainly specialized in various kinds of pneumatic fittings, including joints/connectors, PU hose, PA hose, air cylinders, air source treatment unit, solenoid valves/water valves, as well as the vacuum accessories used for robot industry, etc. Our products covered SMC type, Airtac type, and Festo type. Just tell us the list you need then we will offer you the right thing with competitive price.

Our products enjoy a great popularity and gain acceptance from many customers domestic and abroad because it's high quality, time delivery and good credit. We will also continue to do our utmost to satisfy and provide long-term stable supply for all our clients int he future, and we adhere to be a company trusted by society!

## 产品目录

## PRODUCT CONTENTS

- The useful of TPU tube and description ..... 01
- Unit Conversion ..... 01
- Each kind of material go bea chemistry technology auality ..... 01
- PU hose ..... 02
- PU hose ..... 03
- PE hose/Bourdon tube ..... 04
- PU Clip yarn tube/PA11-6 Nylon tube ..... 05
- Quick connector ..... 06
- Mist fitting ..... 10
- Quick connector(Black & White) ..... 10
- Quick connector G thread ..... 15
- Mini-connector, Magnetic switch and bracket, stainless steel cable ties ..... 16
- Air source treatment ..... 17
- Solenoid valve ..... 19
- C-type quick connector ..... 20
- 3V/4V/5V Series Manifold /SY Series Manifold ..... 21
- Muffler, plugs ..... 22
- Air duster guns ..... 23
- Buffers Series, Vibrator Series ..... 24

**The useful of TPU tube and description**

**Reminder:**

- ★ High fluid temperature or corrosive components may cause hose rupture;
- ★ If the working environment temperature is too high or there are chemical gases in the working space, it may cause the hose to crack;
- ★ Storing in a damp place or for a long storage period can cause hydrolysis or aging of the hose, which may lead to breakage;
- ★ When the adiabatic compression causes an abnormal increase in temperature, the hose may break; When PU pipes are applied to the moving end of vibration and bending, the automatic heating generated by molecular heat may cause temperature rise and lead to hose rupture;
- ★ Precise and high-quality products are completed by precision instruments and strict quality control.

**Precautions:**

- 1) Do not let the hose rub and wrap, excessively stretch or twist, otherwise it will damage the hose and affect the working pressure;
- 2) If the temperature of water or oil is too high, please choose heat-resistant pipes;
- 3) Sufficient allowance should be left for the length of the piping, and when using quick connect, the cutting surface of the hose should be flat and vertically installed;
- 4) When bending PU pipes, pay attention to the minimum bending radius requirement;
- 5) Before using PU pipes, please use a HUITELI pipe cutter to cut the pipes until the diameter is flat and truly round. Then insert the connector vertically into the bottom and try pulling to ensure successful connection.
